FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Honorable Ronald D. Coleman
Member, House of Representatives
Federal Building, Suite 723
700 East San Antonio Street
El Paso, Texas 79901

Dear Congressman Coleman:

This is in reply to your letter of April 23, 1993, in which you inquired on behalf of your constituent, Andy Mazoff, regarding the Notice of Proposed Rule Making (Notice) in PR Docket No. 92-235, 57 FR 54034 (1992). This Notice proposes comprehensive changes to the Commission's Rules governing the private land mobile radio services operating in the frequency bands below 512 MHz.

Your constituent is specifically concerned about the impact of these changes on

Dear Ms. Solheim:

I am writing to you at the request of my constituent who has contacted my office for assistance in resolving a concern within the Federal Communications Commission. I have enclosed a copy of the pertinent correspondence for your convenience.

I would appreciate your reviewing the case and directing it to the attention of the appropriate authorities for any consideration they may give to this matter.

Please advise me of any findings or action taken on this matter.

Dear Congressman Ronald D. Coleman,

The FCC is considering a rule that will crowd the RC frequencies. I am a radio control pilot, 41 years old with a rather large investment in this sport. Some model planes have several thousand dollars in them. There are also helicopters, boats, cars, etc. all of which represent many hours of construction time. The proposed FCC rule change will cause radio interference which will in turn crash planes and perhaps cause other damage as well.

You may want to drop by an active model field for a look at this sport. A good example of an out growth from RC is the Army's Remote Piloted Vehicle Program, which the Iranians surrendered to during the Gulf War. The Army has RC planes that are fitted with video cameras, which are used for reconnaissance. There are many other applications such as flying cables across deep gorges so engineers can then pull heavier cables across for bridge building.

We also have a national organization the Academy of Model Aeronautics which provides members (100,000) insurance. a national flying site with a museum and various flying competitions including the nats which consists of many categories for instance there is scale. pattern freeflight pylon racing carrier, goodyear racing combat, gliders to name a few.

Page Two

I thank you for attention to this matter.

Sincerely,

Andy Mazoff
